PURCHASING FEATURES FOR TICKETOPS:

- At the PNE, we have invested time and effort into ensuring that we provide the highest level of transactional security possible for all our credit card holders. We have implemented 3D Secure technology (Verified by Visa and MasterCard SecureCode) to enhance our fraud screening processes and protect your information. This technology is similar to Chip and PIN processes used in most retail locations in Canada. Through these security services, a personal password is created known only to the individual and their bank. When using TicketOps, the purchaser will be prompted to enter their password to complete the transaction. If an incorrect password is entered, the purchase will not be completed and no holds will be placed on the credit card. Enrolment in Verified by Visa and MasterCard SecureCode is mandatory for all PNE online ticket purchases.
- Corporate credit cards are currently not able to enroll in Verified by Visa or MasterCard SecureCode. To make online purchases using your corporate credit card members can pre-register their corporate cards with the PNE and TicketOps to allow purchases to proceed smoothly and efficiently. To register your card, contact the PNE Group Sales department.
- Not all credit cards are accepted on TicketOps as some card issuers have chosen not to be a part of this new security program. Please contact your card issuer to confirm if they participate in either of these programs.
- Credit cards issued outside of Canada are not currently accepted on TicketOps.
- Pre-paid credit cards and debit credit cards and debit cards are not currently accepted as a form of payment on TicketOps.
- Due to higher levels of computer security, not everyone is able to purchase tickets from their work computer. Please inform your members whether this is possible from your place of business.
- In order to purchase tickets online, pop-up blockers must be turned off and cookies enabled in your internet browser.
